

School Violence

At mid the 20th century the first scientific statements appeared, which call attention to child abuse and the serious consequence of the violence.
 Nowadays, the law punishes the children's physical abuse but it does not prohibit it!

Nowadays the unusually brutal forms of violence have been appeared at schools and nearby the schools.

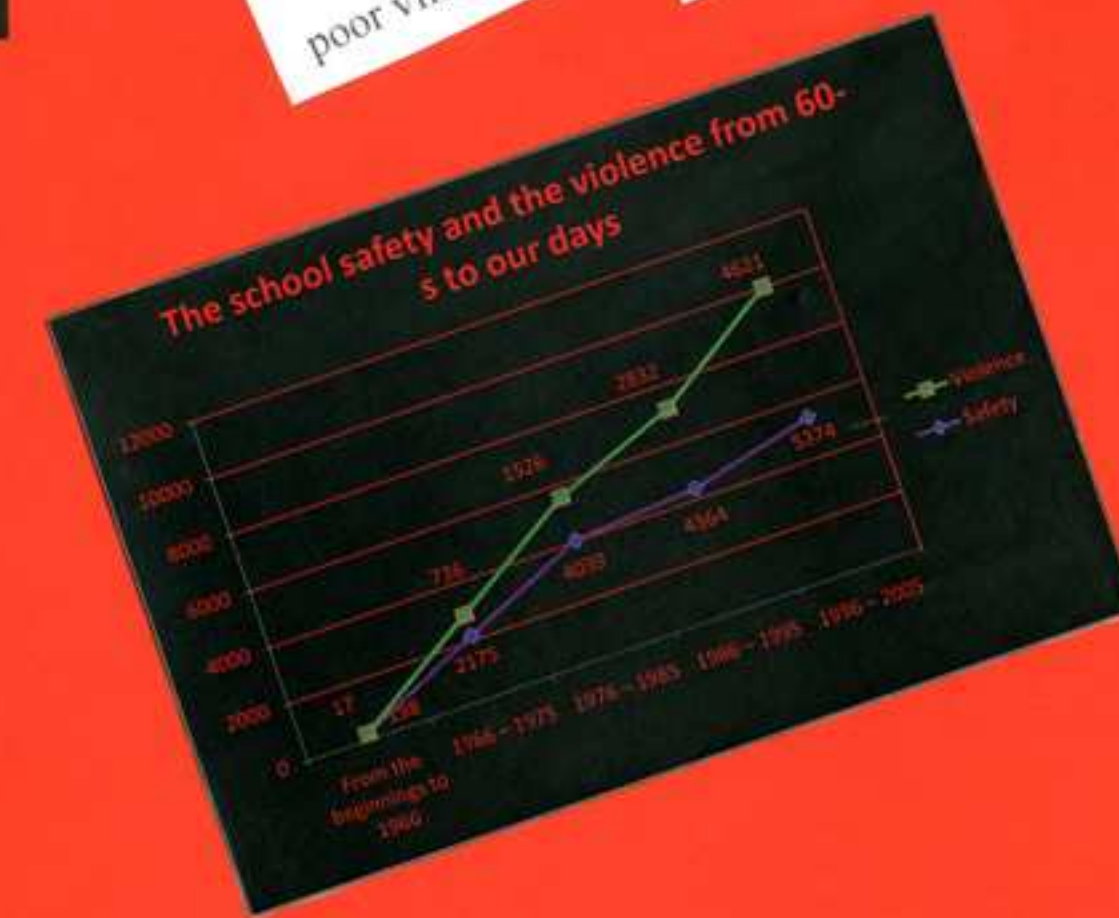

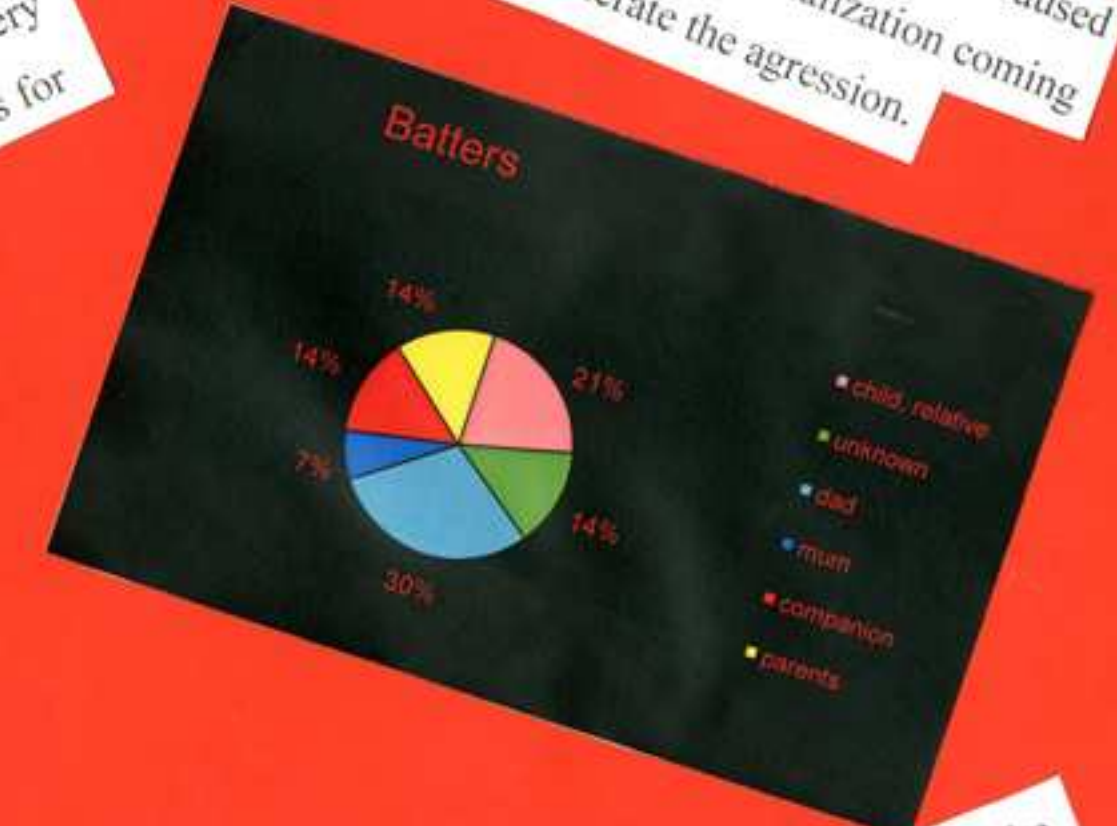

The problem is world wide.

YEAR	LOCATION	INJURED	PRINCIPALS
1999	Columbine	12 students and 1 teacher died, 26 people were injured	took antidepressants, and made suicide
2002	Erfurt	14 teachers, 2 girls, 1 policeman died	suicide
2008	Colorado	6 girls were abused sexually, 1 died	took antidepressants, and made suicide
2007	Virginia	33 people died, many were injured	antidepressants
2009	Pács	1 person died, many were injured	

In other opinion the aggressive and naughty children are the result of the negligence of single parents who bring up children coming from different fathers in the collapsed families. These children cause trouble at school where they are directed because of the social care.
 Due to the others' opinion the resource of the school violence should be made on the violence inside the family which later could be practised by the child at school.

What is the reason of the changes?
 The social reasons outside the school leads to the violence inside the school.
 The poverty, the envy against the rich generate anger and aggression at school.
 According to the researchers the sudden poverty caused by the unemployment and the marginalization coming together with it generate the aggression.

The increase of the school violence is the natural consequence in expansion of general education.
 The violence is brought to school by those who live at the edge of the social or regional slope - on farms, very poor villages-, to whom the mass education comes for the last time.

The very simple comparison of the table shows that the safety of the school, the school violence become one of the.

Although, the explanations are rarely sufficient but the events are real.

What is the reason of the increase in school violence?
 It could be made probable on the example of some countries that the mass production of general education takes important part in the appearance of school violence.

The change of the character in school violence
 The most important difference between a fifty year late new and old school is that the main disciplinary problem is generated not by the break with well-meaning behavioural rule at school but the curl with aggressive order of outside world of the school.

Although, the expansion of the mass education stands at the bottom of the explanation of the school violence, which is sometimes overwritten and overcoloured by the different inside order of schools and the connection of different societies to the violence.
 It is probable that the awareness of the fear from the school violence is high when due to the cultural differences of the expansion in general education the first bigger conflicts appear.

Year	1940	1990
1	Backtalk	Drug taking
